

CONDITIONS IN VARIOUS CAMPS NOW IMPROVING

Great Era of Prosperity Seems
to Have Centered Itself in
Southern Nevada

Conditions throughout the various mining districts of Nye and Esmeralda counties are showing a wonderful improvement and a short respite seems most opportune. In the Tonopah section there has been a marked change for the better and the larger mines are gradually enlarging the scope of development with every reason for believing that the production will be augmented from month to month from this time forward. The Tonopah Extension is probably the busiest mine in the district, followed by the Belmont Development, West End and Tonopah Mining. Smaller properties, such as the Rescue, Elmer, North Star, Buckeye, Midway, New California, Tonopah and Montana, are receiving well merited attention and all are surrendering quite liberally of an excellent grade of ore.

The Divide district continues to gain in popularity and it is evident that within the next few weeks development will be instituted upon a number of promising properties which lie, as a rule, contiguous to the Tonopah Divide. Now conceded to be one of the great mines of southern Nevada, the usual production of about 80 tons daily is being consigned to the Belmont mill, and a substantial net earning is resulting for the treasury of the company. The Gold Zone continues with a systematic campaign of development and the outlook is promising for regular shipments shortly being inaugurated.

The camp of Argentite is striding along and it seems to be a certainty that the coming spring will witness shipments from at least three properties being in order. The shaft on the Molokai has passed the 500-foot point and sinking will be continued to 600 feet, when a station will be cut preparatory to extending drifts and crosscuts. One of a splendid grade has been cut at 500 feet and it begins to look like a real mine was being developed. The Francis and Luman properties are making excellent showings, as are a number of prospects upon which development is in order.

Silver Peak, a close neighbor to Argentite, is busier than at any time in a long period, and the developments on the famous old Mary mine are bringing satisfactory results.

Gibraltar has been attracting a great deal of attention during the past few weeks by reason of the mineral finds that have been made on the property of the New Gibraltar Mining company, and several companies will shortly be in the field carrying out well directed campaigns of exploration. Round Mountain is still active and the hydraulic operations, as well as quartz mining on holdings of the Round Mountain and Fairview Mines company, will be prosecuted vigorously throughout the winter months.

Manhattan continues forging to the front and the production from the White Caps mine is gradually being augmented. The camp is showing much life and the people are in an optimistic mood.

Bellehelen, Eden Creek, Clifford, Silver Bow and other sections, are receiving attention, and indications are favorable for great activity manifesting itself within a very short time.

Some work is being performed in the Klondike that is bringing pleasing results, while Hannaph is receiving attention at the hands of two lenders on two separate properties and both are sending out occasional shipments.

Hornsilver is coming back to life and several properties are receiving attention with every outlook favorable to the scope of operations being enlarged. Goldfield is picking up in a remarkable way due to the settlement of the labor troubles and several companies are planning larger development. The leasing system is still popular and substantial shipments are being made.

Pioneer, in the extreme southern end of Nye county, has been gaining favor, due to finds that have been made of late on both the Pioneer and Mayflower mines where systematic development is in order under the management of W. J. Tobin. Other owners of property are engaged in prosecuting exploratory work and the next few weeks should bring about a great change for the better in conditions generally.

C. M. SCHWAB VISITS HERE DURING WEEK

Captain of Industry Pleased
With Showing of Tonopah
Extension Mine

IS HEAVIEST STOCKHOLDER

Predicts Great Future for the
Southern Part Nevada in an
Industrial Way

The outstanding feature of the week touching upon the mining industry in the Tonopah district proper, lay in the visit of C. M. Schwab, steel magnate and captain of industry, and Dr. M. R. Ward, president of the Tonopah Extension Mining company. Mr. Schwab, who is perhaps the heaviest stockholder in the corporation, came here to investigate personally regarding the wonderful mineral showing that is taking place on the Extension, and upon the conclusion of his inspection, announced that he was satisfied the mine was the biggest in the United States, if not in the entire world.

Messrs. Schwab and Ward, accompanied by their wives, arrived in the special car, leaving on Wednesday morning, amidst the blowing of whistles, and their advent into Tonopah was made the occasion of a great welcome. They spent the morning in making an inspection of the Victor shaft workings, where tremendous bodies of ore are showing on the various levels down to the 1880 level, and upon being returned to surface a luncheon was served in their honor at the Victor boarding house and which was attended by the executive and clerical forces of the mine. In the afternoon, Mr. Schwab and John G. Kirshen, the general manager, visited the public school, where Mr. Schwab delivered an interesting address to the pupils. Between 4 and 5 o'clock in the afternoon a public reception was held in the lobby of the Mizpah hotel, where the visitors were greeted by hundreds of citizens. At this gathering Mr. Schwab urged community spirit among the people of Tonopah. He paid a high compliment to Mr. Kirshen, and stated that during the sixteen years he had known our local residents he had never found Mr. Kirshen's judgment misplaced and that he stood ready and willing at all times to back him to the limit.

The party left Thursday morning for San Francisco, later going to Los Angeles, thence to Joplin, Mo., and then to New York City.

Official report of operations for the week ending Friday, Dec. 1, follows:

McKane Shaft
1200 level—West drift 1203 was advanced 23 feet in Extension breccia; 1204 crosscut was extended 33 feet in Extension breccia.

Victor Shaft
1680 level—Stoping on Murray vein.

1260 level—Crosscut 1720 advanced 28 feet in West End rhyolite; 1707 east drift advanced 10 feet on low grade ore.

1880 level—West intermediate drift 1802 advanced 17 feet on five feet of ore; 1803 west drift advanced 25 feet on five feet of ore; 1813 crosscut advanced 14 feet in ore of fair grade; 1815 raise advanced 14 feet on five feet of ore; 1816 raise advanced 17 feet on five feet of ore; 1817 raise advanced seven feet on six feet of ore. Stopping on Murray and Anchor veins.

Cutting station at 2000 level. Development, 184 feet.

SPEARHEAD IS MAKING READY LARGER WORK

Shaft Being Retimbered and
Crosscut is to Be Driven
on 200-Foot Level

The Spearhead Gold Mining company, Reorganized, of Goldfield, has issued its annual statement, along with its notice of assessment, No. 17. The financial statement covers that period from January 1, 1922 to November 15, 1922 shows the accounts well itemized for examination. It also shows that the last two assessments were paid in full.

A map of the newly acquired claims on the Comstock lode also accompanies the letter. Starting with two claims the Spearhead has gradually acquired other properties until now the Comstock holdings along the Suncor vein amount to about six full claims.

In speaking of the prospects of the company, Secretary A. A. Cold in the circular letter says: "This shaft was sunk to a depth of 500 feet in the early days of the Comstock by former owners. When the drop in silver occurred along in the 80s and practically every silver mine in the country had to close down this property was an exception and was closed down. Nothing has been done on the property since that time. The timbers had all rotted away but the bare shaft is standing today practically as good as ever. We are now retimbering this shaft, the first lift will be to the 200 level where we will start a crosscut out into the main vein, then continue our work in retimbering the shaft to the 300-foot level when another crosscut will be started. We will open up the mine at these points. Ore bodies are known to exist in the main vein at these depths and it is only a matter of work for us to open them, when we are confident that the Spearhead will be put on a steady producing basis."

Of the condition at the Goldfield property, he says: "The Goldfield property consists of two patented mining claims, situated in the center of that wonderful camp. The property is situated only about 1000 feet southerly from the Goldfield Deep Mines shaft. Should the Deep Mines company open up ore at their deep levels it will then bring back a new boom for the Goldfield district."

NORTH STAR SHOWING MOST ENCOURAGING

The Tonopah North Star Mining company is making a good production record and during the month of November approximately \$9000 was realized from the sale of ore to the Tonopah Belmont mill. There was shipped during the month four cars of ore having an average weight of 58 tons and an average value of \$44 per ton. This ore is coming from the 870 intermediate level, 900 level and 1050 level. A splendid showing is reported on the 900 level where a vertical vein has been intersected that shows four feet of ore and from this working the principal part of the production was made during the month. The North Star is looking better today than in a long period and the outlook for the future is most promising. A. E. Lowe, the manager, is doing considerable work in the upper levels, but nothing of importance is ready at report at this time.

Should Know These Facts
About Baking Powder**

—that a big can at a low cost many times results in bakings that are unfit for food.

—that lack of proper leavening strength means failure and disappointment on bake-day.

—that one cent's worth of inferior Baking Powder many times ruins one dollar's worth of other ingredients.

—that millions depend on

CALUMET
The Economy BAKING POWDER

not because of quantity but on account of quality—not because of price but by reason of results.

That is why the sale of Calumet is 2½ times as much as that of any other baking powder.

Buy it—try it—never fail to use it.

A pound can of Calumet contains full 16 ounces. Some baking powders come in 12 ounce cans instead of 16 ounce cans. Be sure you get a pound when you want it.
